

Portable Video Game System Adapter

Game Save Device

INSTRUCTION MANUAL

- ▶ ED64Plus can support a maximum of 512Mbit(64MBytes) ROM images
- ▶ Support SD, SDHC, MMC card with FAT, FAT16, FAT32 format (maximum 32GB)
- ▶ Multi CIC chip compatible (note.1)
- ▶ Supports all games of the region corresponding to the console (PAL system need to order PAL version ED64Plus)
- ▶ Region free (will play a PAL ROM on a NTSC system, and vice-versa)
- ▶ Supports all save types (SRAM, SRAM128Kbyte, EEPROM16k, EEPROM4k, FlashRam)
- ▶ Stores cartridge based saves directly on the CF/MicroSD card (note.2)
- ▶ Supports homebrew ROMs
- ▶ Most games load within a few seconds. Larger ones take several seconds.
- ▶ Drag and drop support directly to SD Card
- ▶ No proprietary extra adapters involved
- ▶ Supports multiple ROMs up to the capacity of the SD Card
- ▶ Supports sub folders
- ▶ ROMs are stored indefinitely until files are deleted or the SD Card is formatted
- ▶ Continued menu, firmware, GUI, and hardware development support
- ▶ 64MBytes of high quality Micron RAM onboard
- ▶ High quality 4 layers printed circuit board and SMD components
- ▶ Does not require any special hardware or software to flash games
- ▶ N64 menu is navigated with the gamepad
- ▶ Uses SD Card to store ROMs
- ▶ Reset button takes the user back to the ED64Plus menu
- ▶ Easy to use once set up properly and then recommended for the novice user
- ▶ Most commercial ROMs backup work (* Some CIC6105 ROMs backup require the patched versions still)
- ▶ Most games which required a patch for old copiers work with or without a patch
- ▶ Support byte swapped ROM and non byte swapped images

Note.1

The ED64Plus cart require a commercial N64 game cartridge with CIC6102 to be plugged into it as a dongle for the CIC microchip protection check. However, there are only one CIC6102 cartridge need.

Note.2

The ED64Plus launch a ROM with corresponding save type automatically. All save types are fully supported. However, the ED64Plus menu allows changing of the save type prior to launching a ROM. This is done by pressing the L/R buttons to cycle through the different cartridge save types. When game is playing, press Reset button will take the user back to the ED64Plus menu, and the ED64Plus automatically creates a save file on the inserted SDCard within the /ED64P/SAVE folder. Each save game will have an extension corresponding to what type of save it is.

Control:
